SUMMARY

I am a dedicated and results-oriented programmer with a passion for learning and implementing solutions in Web Development and other Software Engineering fields. I am committed to achieving excellence in every aspect of my work. My expertise includes Java, JavaScript, TypeScript, and Python languages. – Proficient in designing and implementing efficient algorithms for various problem domains. – Experienced in optimizing code and algorithms for improved performance and scalability. – Strong understanding of data structures and their application

EDUCATION

Indira Gandhi National Open University – Head Office

2018 –

2022

Bachelors

EXPERIENCE

Techlious Solutions

January 2023 – January 2023

SoftWare Engineer

During my 6-month internship at Techlious, I had the privilege of diving headfirst into the world of full-stack development with a primary focus on the MERN (MongoDB, Express.js, React, Node.js) stack. This invaluable experience has been instrumental in shaping my career as a software developer.

PROJECTS

Airbnb clone

this is a clone project to showcase logical and ui implemntations.
